

Piper Unified School District 203

Energy Savings Performance Contract (ESPC)

Piper Unified School District needed to meet the challenge of growing enrollment by adding new facilities while maintaining the integrity of aging facilities. The district faced the challenge of renovating its high school, including the demolition and rebuilding of a 30,000 square foot wing.

Con Edison Solutions through its subsidiary, Custom Energy Services, worked with the district to develop a comprehensive phase I and II plan that addressed all of these issues. Under the Kansas Facility Conservation Improvement Program, we were able to implement needed facility upgrades, meet growing technology challenges, and improve sports facilities in the existing buildings. As a result of this project, the district reserved bond money to help fund the building of new facilities. Having the ability to obtain \$11 million in funding from a bond issue, the energy performance contract provided nearly 25% in additional funding to meet needed improvements. The energy performance contract was closely tied to the renovation project with shared engineering and construction management roles.

ENERGY CONSERVATION MEASURES

Lighting and Lighting Controls

- High efficiency lighting
- LED exit signs
- Occupancy sensors

Building Controls

- Energy management system

Heating and Cooling

- Variable air volume rooftop units

Building Envelope

- Roof

Water Conservation

- Low-flow water fixtures

Additional Upgrades

- Voice-over internet protocol
- Security system
- Football field and 8-lane running track

PROJECT DATA

LOCATION

Kansas City, KS

CONSTRUCTION DATES

Completed on time

CAPITAL COSTS

\$7,512,727

ANNUAL SAVINGS

\$304,348

ENVIRONMENTAL BENEFITS

218 tons of harmful greenhouse gas emissions reduced annually

Equivalent to:

- Preserving 1.4 acres of forest from deforestation* or
- Conserving 460 barrels of oil*
