

**Design/Build
Services for
Energy Systems**

One Contract.
One Integrated Team.
One Superior Result.

Our Program Benefits

- A trusted name in energy
- One-stop, turnkey services
- Guaranteed price caps and budget transparency
- A single point of accountability
- Vendor/manufacturer independence
- Faster delivery and fewer delays
- Lower future energy costs through system optimization

Unmatched Legacy

Con Edison Solutions builds on a legacy of service and reliability to offer design/build services that deliver peace of mind. We coordinate your energy project from start to finish, drawing on our expertise to engineer, design, secure, and manage day-to-day details. You can be confident that your building systems, energy/water, and life safety projects will progress on schedule.

Reduced Risk

Our design/build approach has been refined over decades of managing new and retrofit energy system construction projects for government, education, and healthcare clients. It is proven to reduce the risk of cost overruns and system under-performance, focusing on meeting your unique requirements.

Design/Build Services at Work

General Services Administration (GSA) Ted Weiss Federal Building | New York, NY

Challenge: For decades, the GSA, through its eleven regional offices, has pursued energy efficiency for its 9,600 buildings in more than 2,200 communities nationwide.

Solution: Con Edison Solutions implemented numerous energy-reducing and energy-sensitive operational design recommendations, so the Ted Weiss Federal Building's mechanical systems operate at peak efficiency.

Project Value: \$2.8 million

Columbia Public Schools | Columbia, MO

Challenge: The Columbia Public School District is comprised of 30 school buildings. Many are older facilities that were constructed without central air conditioning. For the safety and comfort of the faculty, staff, and students, a resolution was needed.

Solution: Con Edison Solutions installed ground-source heat pumps, one of the most environmentally-friendly and energy-efficient ways to heat and cool a building. An aggressive project schedule was designed so that air conditioning was in place for summer school. In addition, new roofs and full window replacements were installed to optimize efficiency of the school buildings.

Project Value: \$14.1 million

Hospital Corporation of America (HCA) | Nashville, TN

Challenge: HCA owns and manages approximately 179 hospitals and 104 freestanding surgery centers across 21 states. The projects HCA required included energy and water usage reduction, HVAC, chiller and cooling tower replacements, fire protection, fire alarm installations and upgrades, electrical power distribution upgrades, and emergency power installations.

Solution: Con Edison Solutions performed its services as the prime contractor for work conducted under a Master Services Contract, providing all labor, equipment, materials, and incidentals. Professional services, including project engineering, design, construction administration, and construction inspection services were combined in one contract.

Project Value: \$50 million +
