

Energy Services Overview

Government, Education,
and Healthcare

Meet a Leader in Energy Services for Government, Education & Healthcare

Con Edison Solutions is a multi-disciplined, U.S.-based energy services company (ESCO) serving government, education, and healthcare institutions. We have a deep and experienced engineering staff, with more than 20 percent LEED[®] accredited. Together with our experienced field project and construction management teams, we bring unsurpassed expertise and industry-recognized personal service to our clients.

We draw on more than 30 building technologies and services to help our clients optimize facility performance and resiliency. Our clients have come to rely on us to dramatically reduce operating and energy expenses with minimal impact on capital budgets.

Our Experience: Nationwide Energy Efficiency Expertise

Our energy services, sustainability services, and renewable energy solutions are designed for federal, state, and local governments, commercial and industrial developers, school districts, higher education, and healthcare clients.

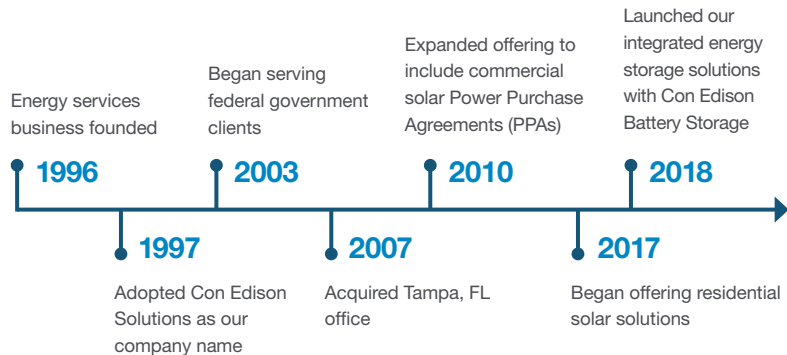

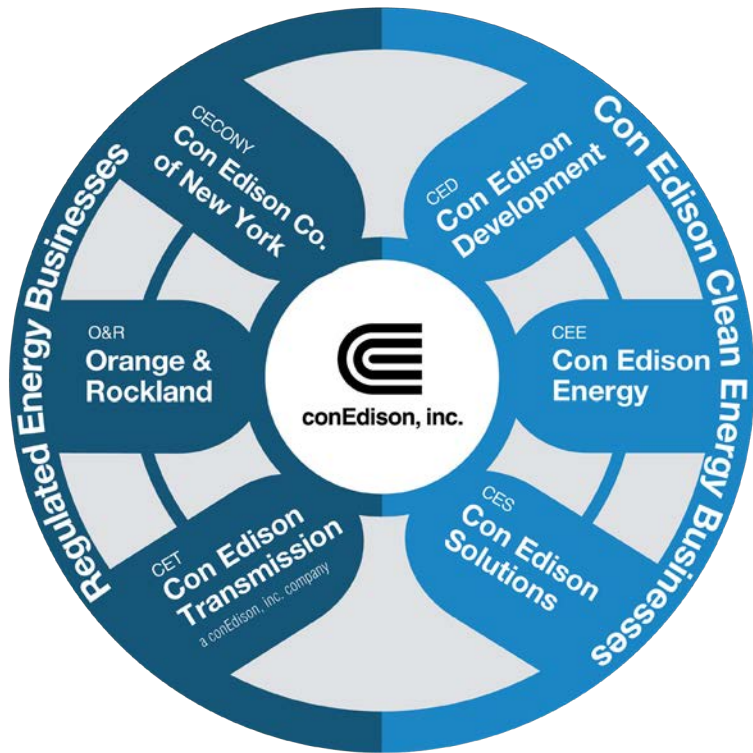

Our dedicated team of energy professionals delivers a broad range of products and services, including energy performance contracting, renewable energy, energy storage solutions, and design/build services.

Our clients work with us to achieve a wide range of institutional goals including operational excellence, cost control, sustainability, energy efficiency, resiliency, and capital preservation.

Our Heritage: Nearly Two Centuries of Service

Con Edison Solutions is a subsidiary of Con Edison Clean Energy Businesses Inc., and part of the Consolidated Edison, Inc. (NYSE: ED) family of companies, one of America's largest investor-owned energy companies with a heritage dating back nearly 200 years. Consolidated Edison, Inc.'s assets are valued at more than \$55 billion.

Con Edison Solutions is accredited as an Energy Services Provider (ESP) by the National Association of Energy Service Companies (NAESCO), which is the organization's highest level of accreditation.

Sustainability Services

Con Edison Solutions offers a full range of client-specific sustainability services. Depending on a client's objectives, facility operations, and financial goals, these services may include a combination of technologies including integrated battery storage.

As a key participant in every sustainable energy project, our engineering team will fully assess a client's facilities for Leadership in Energy and Environmental Design (LEED®) certification. As a service to all of our sustainability clients, our energy specialists also offer advice and can procure renewable energy and/or Renewable Energy Credits (RECs).

Performance Contracting

As a fully accredited Energy Service Provider by NAESCO, Con Edison Solutions excels at Energy Performance Contracting. Our exclusive multi-step, client-first approach considers every aspect of a client's energy use and needs. From the initial energy audit to commissioning and subsequent performance guarantees, our clients enjoy the peace-of-mind that comes with getting state-of-the-art, energy-efficient equipment upgrades—with no capital outlay or budgetary risk. In addition to improved efficiency, new equipment is more reliable allowing facility staff to focus on more meaningful projects.

Design/Build Services

Con Edison Solutions also provides an engineering and construction service that combines both the design-phase and the build-phase into one comprehensive project. Our time-honored approach of transparency greatly improves engineering and construction continuity, speed of delivery, project quality, and budgetary control. With our engineering design/build services, Con Edison Solutions is the sole point of contact to manage and control an entire facility project from conception through construction, operations, and measurement & verification (M&V).
